Got Spam? Report it!

If you receive any unsolicited bulk email (email that you have not requested and/or is suspicious) and you think it should be blocked, you will need to report it.

How to do it:
1. Click on the suspicious email in your Inbox
2. On the “Home” ribbon, click on the little black down arrow next to the word “Junk”
3. Then select “Report Junk”

This will send the email to Microsoft, our email filtering company, for them to add to the filter. Reporting junk/spam email will help improve our filtering system and reduce the number of these emails that we get.
